

Mitten Craft Directions

1. Color each mitten and the animals.
2. Cut out mittens, staying outside of the line so the hole punches are visible and whole.
3. Cut out animals but keep “The Mitten” script which is at the top!
4. Place both mittens together and use yarn to “stitch” together. Starting at one end, you can either tie a knot or tape the yarn down and then go in and out the holes, so the mittens are together.
 - a. This activity strengthens your fine motor skills as well as your hand-eye coordination. Both are needed for reading and writing!
5. Once your mitten is stitched, you can read the script starting with the mouse! When the animals “climb in” to the mitten you can place them into the mitten at the bottom (see photo). Continue until all animals are in the mitten!
